

Feel like Second Nature

For more than 45 years THUASNE THÄMERT has been producing breast forms, lingerie and swimwear of the highest quality in Europe. With continuous improvement and the regular development of new and innovative products, their SILIMA brand (products) keeps pace with advances in international surgery techniques. The greatest care has gone into the production of every breast form and garments to give comfort and confidence to women who have undergone breast surgery.

THUASNE THÄMERT is very dedicated to providing products which will meet the needs of the patients to the fullest extent. With Cancer Survivors having been through such a harrowing time and understandably feeling that life will never be the same, they have made it their mission to provide their clients with products that will restore their dignity, femininity and confidence, thereby enabling them to embrace life with renewed vigour.

SILIMA lingerie is renowned for its quality and style. The design of the garments and the soft fabrics used, ensure great wearing comfort and protection/support for women of all ages. SILIMA underwear combines colour and design to remain in line with the latest trends. From exclusive to classic, the underwear collection offers a choice of models that will suite every customer and every situation or need. There are a number of bra styles available as standard stock in South Africa (see below). For the full SILIMA range, please browse through our website www.blmed.co.za

The SILIMA silicone breast forms contribute towards the users feeling of natural wellbeing because of its silky, gentle feel against their skin. The technology and materials used in the production of the forms enhances their durability, reduce their weight and ensures very natural shape and movement of the forms. One of the greatest features is the fact that all the breast forms can be worn whilst swimming as well as during other forms of exercise.

The SILIMA breast form range caters for all body shapes and levels of volume loss due to surgery. Whether the patient has undergone conservation surgery such as a lumpectomy, partial or full mastectomy, SILIMA offers a range of products to restore a natural, symmetrical bust contour. These forms can be used during the breast reconstruction process to retain a natural bust profile until reconstruction is complete.

M.O.P.'s (Medical Orthoses Prosthetists are medical professionals who specialize in the fitting, and often manufacture, of orthoses and prostheses (O & P). They help patients regain their mobility by fitting them with artificial limbs (prostheses) and orthopaedic braces (orthoses). These medical practitioners are extensively trained to diagnose, prescribe and fit prostheses as well as being the best qualified to advise and guide patients in the selection, and fitting, of a suitable breast form and bra. With all SILIMA products being Nappi coded, Orthotists are in a position to drive the process of acquiring medical aid approval for the funding of breast prosthesis and garments. Having an Orthotist fit your breast prosthesis can become a long term relationship. They are available for advice and can be contacted for any guarantee issues.

BL MEDICAL has a national network of affiliated M.O.P.'s in South Africa that will be able to assist you. Check our **DISTRIBUTORS Tab** on the www.blmed.co.za **Home Page** for an Orthotist who is a SILIMA Stockist in your area.

If you have any questions regarding the SILIMA range of products, feel free to contact us via the following e-mail address: admin@blmed.co.za
